(54) Title: DOUBLE SCROLLING

(57) Abstract: A method of providing screen scrolling in content, such as hierarchically ordered content, is provided, wherein at least one level in the content comprises a page level comprising pages of objects and an object level comprising the objects, the method comprises the steps of: scrolling the objects page-by-page in the page level, and scrolling the objects object-by-object in the object level. Especially when scrolling in larger amounts of content, such as hierarchically ordered content, it is an advantage of interweaving a page by page level with an object by object level, so that the user may choose a specific level to navigate either page-wise or object-wise.
